B. M. ROBERTS

THE MAN WHO DOES THINGS

Radio Service Greatly Enjoyed

The radio service in connection with the world's basketball series furnished by J. M. Moffatt was generally appreciated by a large number of enthusiasts who braved the rather chilly weather. Mr. Moffatt's diamond and accessories for bulletining the game were deserving of the praise they received.

Coyotes Ridden Down After Storm

After the recent snowstorm Bert Ruggles and Fred Steeves, of the Guees Ranch killed four coyotes in one afternoon. Horses were used for the chase and clubs for the finish. The coyotes have been able to catch jack rabbits since the storm and had fed to repletion, making them easy to catch.

Charles Thomas Dies Suddenly

The death occurred on Sunday afternoon of Charles Thomas, at his farm northeast of Champion, heart failure being the cause. The deceased suffered from heart disease but prior to the time of his death had been as well as usual, the end coming very suddenly. He was 52 years old. The funeral took place on Wednesday to Ried Hill cemetery, Rev. Mr. Bretton, of Vulcan, officiating. Mr. Thomas was one of the oldest settlers in this district, homesteading here in 1906, and with the exception of a short period when he ran a dory at Carnangay has resided continuously on his land since his arrival. Being an old timer he was widely known and had many friends who will regret his sudden demise. He is survived by his wife, one son and two married daughters. His removal severs another link with the early days in this section, and his family have the sincere sympathy of all in their bereavement.

Shooting parties have been quite frequent during the mild weather and many good bags are reported. Partridge have been unusually plentiful this fall and have provided plenty of action for the gun men.

Liberal Meeting Friday Evening

A meeting in the interests of the Liberal candidates for Bow River, Mr. Jesse Gange, will be held in McCullough's hall on Friday night commencing at eight o'clock. In addition to the candidate Senator Buchanan, of Lethbridge, will address the meeting. A general invitation is extended to electors of both sexes to attend this meeting.

In addition to erecting the highest radio aerial in town J. M. Moffatt has also equipped it with a powerful electric light which may be seen at a great distance. Some of the boys are wondering just what effect this will have on future snipe shoots.

A dance will be given on McCullough's hall on Friday, Oct. 16th, under the direction of the L. D. S. church. Supper will be served by the church Relief Society committee. The Clever Anderson orchestra will furnish the music. Tickets \$1.50.

A thresher going by the name of M. McDonald wrote a cheque of his own signing the name of O. E. Summers and in consequence the police are looking for him. The amount was \$17.25 and H. E. Gill had the misfortune to cash the cheque.

One million dollars in building permits in the past nine months is the record at Calgary which is a considerable increase over last year's record.

Washington won the first game of the world's series by a score of 3-1 on Wednesday, while Pittsburgh took the second game 3-2, evening up the series.

Europe has more men under arms today than at the beginning of 1914.

CHURCH BULLETIN

Rev. J. Lee announces the following services for Sunday next, October 11:
11 a. m.—Sunday School.
3 p. m.—Services at Blason School.
7:30 p. m.—Public worship. Story from "The Pilgrims Progress" and sermon by Mr. Lee, and selection by the choir. All welcome at these services.

NYAL CREOPHOS

HYPHOPHOSPHITES, WILD CHERRY
AND CREOSOTE

Bring British Immigrants In

There are many questions affecting national policy in Canada in regard to which it is natural there should be wide divergences of opinion, but there is one subject, immigration, upon which it should be possible to find common ground. East and West and the Maritimes may differ in regard to tariff schedules, freight rates, railway construction policies, and harbor improvements, but one and all are vitally interested in the question of population and in taxation problems.

Every Province in Canada still possesses large areas open to settlement and any available people to bring them under cultivation and thus render them productive and a source of national wealth. Even the most thickly settled rural districts in Canada are capable of sustaining a denser population through more intensive farming, while in Northern Ontario and Quebec and in all four Western Provinces there are vast unpopulated areas.

On the other hand, there are some millions more people in the British Isles than there are avenues of employment open to them. The British Government is therefore obliged to suggest these people to immigrants, who the population goes on increasing in a greater ratio than the capabilities of the country to employ and support. Nor, in the changed industrial conditions which have resulted from the war, does there seem to be any possibility of a material improvement in this situation.

In times past the United States absorbed large numbers of immigrants from the British Isles, but under its quota system the doors of the Big American Republic are now practically closed. There is a good and sufficient reason for this New World States policy. Population across the line has now reached over 110,000,000, and the annual natural increase is 1,500,000. In other words, every recurring decennial census shows an increase in population of 15,000,000. Before long the figure will be 200,000,000. By far the larger portion of this increase is in the cities, with the result that the United States is rapidly reaching the point where it will no longer be a self-contained and self-supporting nation able to feed its own people. It has, therefore, and quite naturally, called a halt to immigration.

Canada, however, occupies an entirely different position. Our population is small and our territory large, and for the most part unsettled. It is open to serious question whether Canada is morally justified in rightly restricting immigration, and holding large areas unsettled and idle, when millions in the British Isles lack employment because there is none to be had.

Canada may feel that it is not called upon to contribute to the upkeep of the British Navy, and that it should not obligate itself to participate in the defence of the Empire as a whole, and in other respects should not be expected to adopt policies purely from an Empire standpoint. But situated as the Dominion is in the matter of population and current territory it can hardly be denied that, so long as it is part of the Empire, it has some responsibility for the welfare of all British people.

At the present time Canada could render no better service to the Empire, and incidentally to itself, than by existing and getting into effect a well-considered plan whereby a large number of people from the British Isles could be transferred to this Dominion. Something is being done, but not nearly enough. At present we are only nibbling at immigration, instead of going for it in wholesale fashion.

From there are middle which it would be a mistake to bring to Canada or send elsewhere. There are those who by reason of physical handicaps could not succeed in this country. There are others whose whole training is not calculated to enable them to adapt themselves to any other environment than the one they are now in. But there are thousands who could and would succeed in Canada if the means were provided to get them here and give them a fair start.

Canada's doors should be wide open to any Anglo-Saxon capable and willing to work. Let there be health tests to keep out the mentally, morally and physically unfit, but the amount of really cash an immigrant may or may not have should not be a factor deciding his or her eligibility to enter Canada.

Some Trade Unions may take a shortsighted and narrow view of immigration, timid and fearful that an influx of immigrants would jeopardize their own jobs, but past experience has proved such fears to be groundless. Western Canada, at all events, should insist that the new Parliament be elected on October 29 grapple with this question, and make provision for an entirely new and better law in immigration.

Lived To Great Age

With the passing of Mrs. Charlotte Williams in her 93rd year, at Stirling, Ont., there was known the death of six persons, all living within a radius of four miles, whose combined ages amounted to 522 years. Four strangers have ruled over the life of the one who died during the life of these six persons, all of whom were pioneers to this part of the country.

Prince Rupert Elevator

The 122,000-bushel government terminal grain elevator being built at Prince Rupert will be completed by November 1, when the first shipload of ten carloads of grain will be made through it.

Many Auto Accidents

In United States
Records Show That Two Are Killed
Every Hour In Day

The death rate in the United States due to automobile accidents leads the world, being 18.5 fatalities for every 100,000 population against 5.2 in England and Wales, 12 in Scotland, 14 in New Zealand and 3.5 in Canada during 1933. Figures for 1934 show that for 158 American cities, the automobile accident death rate was 16.4 per 100,000 population, causing not less than 17,400 deaths in automobile accidents, not counting accidents which involved railroads, or street cars, and automobiles.

The toll of human life taken by motor vehicles in the United States was at the rate of more than two for every hour in the day. Those statistics have been compiled by the National Safety Council for consideration at the Fourteenth Annual Congress which opened at Cleveland on Sept. 28.

Neuralgia Conquered Its Pain Destroyed

Magical Results Come When You Apply
NERVINE
It Acts Quickly

Mr. W. T. Grogan, formerly connected with the Guide newspaper staff, writes: "For many years I have had Neuralgia in my hands, and for the world would be without it as a remedy for all pain, carpal, toothache, cramps and disordered stomach. I know of no preparation so quick and quick to relieve as Nerve. Remember this, wherever there is pain, rub on Nerve, and you will get prompt results—36c at all druggists."

Easy Job Pays Well
In London is one who makes close to \$10,000 a year by advising other men on what to wear. If he wishes to buy a complete outfit of clothing this gentleman accompanies him on his rounds of the shops and selects the proper colors, styles, etc.

Orange Free State Is Rich

Contains Definitely British Soil

The twenty-five years ago, the Orange Free State, which the Prince of Wales recently visited, is one of the "babies" of the British Empire. It became definitely British only in 1909—just twenty-five years ago.

At this place, however, the Prince saw the "hanging stones," as the Indians call the diamonds, dug out of the earth, washed, sorted and finally weighed.

The tunnels in the mines are lighted by electricity and ventilated by compressed air, while the machinery in some of the coldest in the world. The tunnels are so hot that when a miner goes to work he has to wear a special dress to keep him cool.

Even if a native did steal a stone it would be of no use to him. He cannot sell it, or dispose of it easily, for all diamond dealers must be registered and licensed, and no black man is allowed to handle diamonds.

Not only has the Orange Free State a mineral wealth. It possesses also some ten million sheep, one and a half million cattle, half a million Angora goats, a quarter of a million horses, and also over ten thousand ostriches.

B.C. Lumber Shipments
The total water-borne movement of British Columbia lumber for the first six months of the current year totals \$25,911,833, as compared with \$20,000,000 during the corresponding period of last year. More than half of this movement, or 128,334,398 feet, went to the Atlantic coast.

SUNDAY SCHOOL LESSON

OCTOBER 11
PAUL IN CORINTH

Golden Text: "Be not afraid, but speak and hold not thy peace. Acts 18:1-17. Devotional Reading: 1. Corinthians 2:1-7.

The Text Explained and Illumined

Paul supports himself at Corinth by the labor of his hands, verses 19-24. In 44 B.C., Pompey brought Jewish prisoners to Rome, and the Roman Emperor Nero was so angry with the Jews that he ordered them to be put to death. Nero was so angry with the Jews that he ordered them to be put to death. Nero was so angry with the Jews that he ordered them to be put to death.

To Ship Many Cattle

The Livestock Producers, Ltd., an Edmonton firm which shipped many cattle to the Old Canadian market last spring, plans now to ship 20,000 head of cattle for the British market, according to plans announced by the president of the company.

Grandmother: "Johnny, I wouldn't slide down those stairs."

Johnny: "I know I. You couldn't."

Child Welfare

Big Brother and Sister Scheme for Immigrant Children

The department of Immigration and the Canadian Council on Child Welfare, are planning a big brother and sister scheme for immigrant children, by which responsible members of organizations in the locality where the children are, will be selected to act as guides and protectors.

Externally and Internally, It is Good

When applied externally by rubbing, Dr. Thomas' Eucalypti Oil opens the pores and penetrates the tissues, touching the seat of the trouble and immediately relieving. Administered internally, it will soothe the irritation in the throat which induces coughing and will relieve affections of the bronchial tubes and the respiratory organs. Try it and be convinced.

We Do Nothing

In five years the British forestry department has planted 77,500 spruce and fir and spruce trees for the benefit of future generations at a cost of \$1,000,000. That's nothing. In Canada we can burn down that much in a year and not care a hoot about posterity.—Ottawa Journal.

From School Teacher

To Great Emulsion
A young man who was brought up in a farm in Western Pennsylvania studied diligently and qualified for district school teacher. Further pursuing his studies and teaching, he managed to save up enough money to go to a medical college.

After the Civil War, he began the practice of medicine in the new city of Erie, Pa., and after a time he was a successful doctor, and could easily recognize most of the medicinal plants growing in the woods.

Later, he moved to Buffalo, N.Y., where he became a doctor, and after a time he was a successful doctor, and could easily recognize most of the medicinal plants growing in the woods.

A short time, they were sold by every druggist in the land. Today, the name of this man, Dr. R. V. Pierce, is known throughout the world. His Golden Mistletoe Pills are the best medicine for the cure of all ailments.

The Growth of Radio

Ten Million Sets Predicted For U. S. By Year 1930

Predicting an expenditure of 1450,000,000 for radio by the "Fans" of the nation during 1930, experts have estimated that by 1930 there will be 10,000,000 receiving sets in operation in the country. Five years ago, approximately \$2,000,000 was spent for apparatus, and last year the amount had increased almost 175 times that figure. In 1923, there were 142,350 sets in use on the farms, and one year later the number had more than doubled. At the beginning of the industry, all apparatus were assembled by the owners, but with the steady development of parts and hookups, the volume of ready-built instruments purchased increased until about forty per cent. are now sold ready to tune in. To supply the more than 4,000,000 homes now equipped with receiving sets, programmes are broadcast from 547 stations.—Popular Mechanic.

Cuticura Talcum
is cooling and refreshing after shaving

Men who have tender, sensitive skins, easily irritated by shaving will find Cuticura Talcum, an antiseptic powder, is soothing and cooling to the most tender skin.

Invents New Motor Fuel

Bromine Used in Discovery Is Found In Sea Water

The new motor fuel recently invented in America, and known as Ethyl gasoline, has proved a great success, and is now being manufactured in large quantities.

A curious position has been brought about through this discovery, as large quantities of bromine are required in its preparation, so much so that a world shortage is threatened. Bromine comes chiefly from the famous Stassfurt deposits in Germany, but there is a certain amount of it in sea water.

A floating factory has been made for the purpose of extracting bromine from the sea. This is a remarkable achievement, which has been accomplished by the use of a special process while at sea, producing it, it is hoped, as much as 100,000 pounds of bromine a month.

This search for raw materials from the sea for providing power for industry is probably one of the most romantic developments of modern chemistry.—C.N.

The elementary education sub-committee of the London county council report that 23,575 boys and girls were taught to swim last season.

The map that Columbus used on his voyage to America is held by the National Library in Paris.

THURSDAY, OCT. 8, 1925

NOTES AND COMMENT.

The U. F. A. attacks W. M. Davidson of Calgary because he is running as a Liberal candidate in East Calgary, and quotes former utterances of Mr. Davidson as proof of his change of attitude. But what about the U. F. A.? Where is the "no caucus no compromise" policy they advocated? It is a case of the old adage in regard to living in glass houses and throwing stones.

It is well worth mentioning and is highly creditable to the farmers of this district that they are able to maintain an optimistic attitude to the conditions that prevail this fall. Nothing more trying has ever been experienced in the country and still the assurance prevails that there will be good weather and that the threshing will be completed without excessive damage to the grain.

Weather prophets have been such a dismal failure this fall that it seems almost ridiculous to enter the field in this line. However, at time of going to press the situation is more promising for continuing fine weather than it has been for the past six weeks.

The Effect of High Tariff

Higher tariff duties will make a certain number of people richer, but they will make the great consuming masses poorer. A higher tariff means that everyone will have to pay a little more for the necessities of life and the implements of production. Of what earthly benefit would it be to a manufacturer to have the tariff duty increased on what he produces, unless he was thereby enabled to charge more for their product?

A higher tariff will exclude imports and thus give the Canadian manufacturer complete possession of the home market. But of what avail would that monopoly be if he did not charge a higher price than he is now receiving?

Mr. Meighen argues that prices are lower in the United States than they are in Canada. If that be the case, it must be that our domestic manufacturers take advantage of the tariff they already enjoy against American

imports and mark up their prices accordingly. If the tariff be increased they will make their prices higher.

Our Developing Manufacturing

(By R. J. Deachman.)

Most people seem to be laboring under the delusion that manufacturing is a gentle and fragile flower checked by the first breath of competition and scarcely able to appear above ground in the more or less erratic climate of Canada. Such is not the case. We get a wrong conception of what constitutes manufacturing as it is cultivated in our Canadian cases and other books of statistics. Every country passes through several stages—the first is usually pastoral, then agricultural and commercial. Manufacturing begins only when the primary industry is developed.

You recall our hectic efforts to build industry in Calgary years ago. We built all sorts of baby incubators. There is still a hole in the ground somewhere round this city where we planned a special building with the end in mind. We are wiser now. We have learned our lesson. "It is written," as John Ruskin would say, "in the walls of cities and in their dust from men's feet, the doom before them has laid the foundation." The West this year has a purchasing power due to its crop of let us say \$200,000,000. Let Arthur Meighen raise the tariff even a little and it will lessen the purchasing power of western Canada's crop by 10 percent. What? Yes, \$20,000,000 purchasing power gone—never to return. If a disaster caused such a decline we would be dismayed. You may cause it by your vote. Am I right? I challenge denial.

Industry develops naturally in a country such as western Canada. We have first the agricultural industries, flour making, crop packing, beer, lumber, repair shops—the circle widens as the country grows and population increases. Canada during the last four years has made marvelous progress in manufacturing.

Take, for instance, our great industry of paper making. In the production of newspaper Canada leads the world. Our exports of newspaper last year (year ending March 31, 1925), totalled almost \$82,000,000. It climbed up almost \$20,000,000 in three years. No paper manufacturer of Canada ever looked at Mr. King and said "Ruin!" Newspaper, of course, has very little tariff protection. It is one of the peculiar things of our export trade that the articles in which we are making headway have very little tariff protection. In addition to printing paper we shipped board and wrapping paper, writhing paper, wall paper, roofing paper, boxes and cartons. The total exports of paper in the last fiscal year fell short of \$100,000,000 by the scant margin of \$58,000. Up \$20,000,000 in three years. Turn from paper to flour. Here

again we are masters of the world's markets. While in the Grain Industry Commission last year many leading millers of the U.S. confessed to the writer that eventually the milling business of American would be centered in Canada. Cheap power, wheat of exceptional quality, low costs of production will lead to the centering of that great industry in Canada. Exports have gone up from \$80,000,000 in 1922 to \$70,638,000 in 1923 (fiscal year). Last year there was a relatively small crop in western Canada. Had it not been for that Canada would have established a new record. In the United States, on the other hand, exports are declining. As in paper, so in flour, Canada steps up as the United States declines in the production of these two great basic commodities.

The strangest of all things in Canada today is that our financial press is suffering from an inferiority complex. With tendencies as they are we should be sounding the tocsin of prosperity to the end of the earth; but pick up a financial paper like the Financial Post of Toronto or the Financial Post of Montreal. The newspaper reveals nothing but the oncoming wave of prosperity, but from the editorial page wells up a wail that warns a cork leg and make a wool buffalo climb a fence post.

Last year we shipped of milk and its products, cheese, butter, condensed milk, etc., \$15,972,772 worth, up almost \$10,000,000 since 1922. Did you ever hear of milk powder? Did Mr. Bennett ever hear of it? Well, let us tell that warrier over titles of infinitesimal diminutiveness that we sold more milk powder—manufactured and finished product, remember—to the United States than they imported of butter from all the world with the value of the mutton we brought in from Australia thrown into the bargain. We exported last year of milk powder alone \$174,000 worth to the United States and a total of \$780,000—almost double of the 1922 output. Verily this is Canada's century.

One more item. In the fiscal year ending March 31, 1925, we exported of iron and its products \$57,053,010. Of this sum \$51,401,528 came under the classification of vehicles. The export consisted mainly of automobiles. Our imports under this classification last year were \$25,739,591. We exported over \$5,000,000 worth more than we imported. Nineteen twenty-three was the first year we turned the corner in this industry, exporting more than we imported.

That is enough for one morning. Stand erect, Canadian—away with the globs of gloom. Your dollar is at par—your ships sail on every sea. You hesitate to pick up the wealth that lies at your feet because your statements are full of gloom. This is the day of Canada—"Le jour de gloire est arrive."

Local and General

W. L. met at the home of Mrs. D. Watkins on Thursday.

Mr. and Mrs. L. J. Adams spent the week in Calgary.

For Sale—Six hole range. Apply to Mr. T. Gill, next door to Ford Garage.

Born—To Mr. and Mrs. F. Falkins, a son, Sept. 6th at Lethbridge.

Get ready for the big Halloween dance the W. L. are putting on.

Ed. Ellison is sufficiently recovered from his recent accident to be around on crutches.

Enumerator Bridgett has completed compiling the list for Champion poll and finds 220 voters.

Some of the farmers in this vicinity are still expecting to thresh this fall. Hope lives eternal.

C. S. Pingle's majority in the Medicine Hat bye-election is 375 before the counting of second choices.

The Ladies' Aid are holding their annual bazaar on Saturday, November 28th. Further particulars will be published in future issues.

Alberta University is receiving a heavy registration for the coming term. The number of students in attendance is likely to exceed last year's total of 1350.

A shooting party headed by R. M. Roberts carried a goose on Tuesday afternoon and it took a good share of the evening to convey the good news to the habitants.

G. F. Smith returned last week from Brooks with a carload of cattle for the Champion Meat Market. He was forced to leave his car at Brooks owing to impassable roads.

John F. Miller eye sight specialist, of 404 Underwood Block, Calgary, will be at the hotel in Champion on Thursday Oct. 15th. Tell your neighbors he is better equipped than ever.

The difficulties included in the conditions caused by bad roads was an almost general shortage of coal. Deliveries of small loads have been made this week and this, with supplies secured from the local elevator Companies have tilted the difficulty over.

Bread, made from flour manufactured at the new Vulcan mill, ground from wheat grown in the Vulcan district, and produced at the Vulcan bakery, has this week for the first time been available to Vulcan people. It is first class bread, white, light and wholesome, and of the kind that will surely make "Pantry Queen" popular. It marks also the achievement of an enterprise that has cost much money and long labor, and the owner of the mill and residents of the district will rejoice in the prospect of success which it indicates.—Vulcan Advocate.

A. D. Diemert, who has been at Lethbridge, Montana, for the past six months returned to Champion recently and will remain here in future.

The Ladies' Aid will meet at the home of Mrs. D. Harper Oct. 15. Mrs. Boner and Mrs. Hardisty will assist in serving. A cordial invitation is extended to all ladies.

W. H. Miller, of Carmangay, was here on Wednesday evening arranging for a meeting in McCullough's hall on Monday evening when J. E. Garland and others will address the electors.

An average of a new settler a day is being placed on the Lethbridge Northern Irrigation tract, states James Pike, manager for the tract under the provincial government supervision.

A total of 71 homesteads were filed on during the month of September in the Edmonton land district, which includes a large territory in central and northern Alberta. In addition to this 11 soldier grants were filed on.

For the first time in the province's history, Alberta has taken first rank among the provinces of Canada, in the production of natural gas. The Dominion bureau of statistics report for the production for the first six months of this year states that Alberta's production during that period was 4,087,084 million cubic feet, with Ontario second with a production of 3,257,420 million cubic feet.

Maynard Obituary

(Continued)

The sad news came to our vicinity of the death of Mrs. Mable Maynard and baby daughter, Margaret Landon, who both passed away on September 14, at her home in Los Angeles, California.

The deceased Mrs. Maynard was the oldest daughter of the late Miriam Standish, who lived in the Champion neighborhood for some time. She attended the Consolidated School and Sunday School of this vicinity and during those ten years made many schoolmates and friends.

We cannot think of this beautiful young life of 18 years and 2 months, as dead, but that the mother and babe are, as the choir sang "Safe in the arms of Jesus."

The many floral offerings were the expression of the sympathies of friends and relatives and also of the high esteem of the one who has gone beyond.

Interment was made in the Memorial Park of the Anglican cemetery. Those who survive are, the husband, Mr. Roy Maynard, the mother, Mrs. T. Hosford and sister Dorothy, both of Spirit Lake, Idaho.

Jas. Brown

Sues C. P. R.

A claim for \$5000 damages has been filed by Oshund and Brown against the C. P. R., on behalf of James B. Brown, husband of Champion. The plaintiff claims that through the negligence of the defendant company he met with an accident while working in its yard at Carmangay on October 10 last, resulting in the breaking of his left leg above and below the knee, as a result of which he was confined to the hospital for 10 weeks.

It is alleged that the defendant company was negligent in running a weigh-freight in a southerly direction in its yard at Carmangay at an excessive speed and in not having said train under proper control and in not stopping the freight. The result was that the way-freight "ran into the hand-car upon which plaintiff and other section men were employed.

Special damages of the sum of \$1070.29 are claimed for loss of time at the rate of \$3.04 a day from October 10 to date hereof, and general damages for pain and suffering and

Farm Land For Sale

S. W. 1 of Sec. 29; T. 15; R. 25; W. of 4th Mer. containing 161 acres more or less.

By public auction in front of the Post Office at Vulcan, on Saturday, the 24th day of October, 1925, at 1 o'clock p. m., by C. B. Schimp auctioneer.

The lands are situated in a well settled and excellent farming district about thirteen miles from Vulcan and about the same distance from Champion and within one and a half miles of a school.

Buildings: House 12x24, barn 10x14, shed 12x10, stable 12x14, granary 10x20, granary 10x14. Also a good water supply from two wells. Approximately 113 acres have been broken and there are about 50 acres in summer fallow for 1926. The soil is chocolate loam clay subsoil.

The property will be offered for sale at an upset price of \$2900.00 at which bidding will start.

Terms: 10 per cent cash—balance into Court in 60 days without interest. Satisfying conditions to apply.

Action No. 24380 Supreme Court of Alberta.

Further particulars may be obtained from McLean, Patterson and Company, solicitors, McLean Block, Calgary, Alta.

Dated at Calgary, this 28th day of September, 1925.

permanent disability in the sum of \$3920.85.

ALTERNATIVE CLAIM

In the alternative the plaintiff pleads the Workmen's Compensation act, and says that, if it is found that he is not entitled to damages as outlined, he is entitled to compensation under the act at the rate of \$10 per week from 1 October 19 until he is declared fit for work by a competent medical etc. student.

SAVOY CAFE

Thomas A. Edison has patents to his credit for every year since 1880.
X-ray is now being used successfully in the treatment of whooping cough and for the infant's disease, rickets.

Ten thousand trousers can be made from the mouth of one whale. The first step in the manufacture of such articles is to "slide" the flippers, after which they are slit in this strip.

Fabrics are now waterproofed by plating with a thin coat of rubber, the process much resembling the ordinary electroplating of metals. The process is said to simplify the waterproofing of garments in a great degree.

A new anti-silicant machine gun uses tracer bullets every fifth shot in place of sights.

**To Newspaper
Subscribers**

Readers of The Chronicle are reminded that A. H. Pentman can secure any needed magazine or newspaper printed on this continent for you promptly. He is specializing in the Curtis publications which include the Ladies' Home Journal at \$1.00 per year; The Country Gentleman at three years for \$1.00, and the Saturday Evening Post at \$1.50 per year. Parties desiring to begin or renew subscriptions will find it more satisfactory to do their business through an accredited agent than to send themselves, and the cost of the remittance is saved them.

**Whist Drive
And Dance**

Under the auspices of the O. E. S., the first whist-drive and dance of the season will be held in Campbell's hall on Monday, Oct. 12th.

In the past these parties have proved very popular. Come and have a good time. Tickets start at \$1.15. Admission 75 cents each, including tax.

Two thousand farmers in the province are being notified by the Department of Agriculture of the forthcoming International Hay and Grain Show at Chicago, from November 23 to December 5, at which Alberta farmers have always been prominent exhibitors. Farmers who intend to exhibit this year are asked to have their entries into the Provincial Department of Agriculture by November 3rd, as all entries must be in Chicago by November 9. Exhibits are to be shipped to the seed clearing plant of the Department at Edmonton, from where the Department will pay freight or express to Chicago. The exhibits are to be in place in Chicago by November 23. The Department will also bear the expense of putting up the exhibits. The Department is offering again an honorarium of \$120 for each grand champion won by an Alberta farmer, and \$100 for each first prize.

Canned Fruit, Tails, in great varieties—Pineapples, Blueberries, Grape Fruit, Apricots, Raspberries, Plums, Cherries, Peaches and Blackberries, per can 25c, per doz. \$2.95.

An artificial Niagara Falls at an altitude of 6,000 feet has been completed in the Alps to generate electrical power to run all the trains in Switzerland. The dam, 818 feet in length, was built in three years at a cost of \$12,500,000.

Nearly 10,000 women in Canada are actively engaged or interested in agriculture.
